Volume 3 Issue 1

The Right Funds at the Right Time

January 2008

Energy, Natural Resources, and Energy Service led the way for the Top Eight Model Portfolio with one-month gains of 9.0%, 8.5%, and 6.5%, respectively. Materials, Chemicals, and Gold followed with gains of 1.9%, 1.4%, and 0.2%. Consumer Staples and Wireless trailed with losses of 0.6% and 2.2%.

The Top Eight Model Portfolio, the Nasdaq Composite tracking portfolio, and the S&P 500 tracking portfolio 2007 YTD (one-year) returns were 19.463%, 10.497%, and 5.426%, respectively.

Qualified Dividends, Capital Gains Tax Break

May, 2003, tax law changes gave us a tax break on qualified dividends and long term capital gains, which are now taxed at 5% for lower tax brackets and 15% for higher tax brackets. In May, 2005, lawmakers extended the expiration date for this tax break from December 31, 2008, to December 31, 2010, and they made it even better—the 5% tax rate goes to 0% for 2008 to 2010, although the 15% rate for higher tax brackets remains the same. Starting in 2011, barring further extensions or other tax law changes, qualified dividends will be taxed as ordinary income and capital gains will revert to pre-2003 rates of 10% for lower brackets and 20% for higher brackets. Of course, with a new president and a new Congress in 2009, these tax breaks could be rescinded early.

If you are investing in Top Eight Model Portfolio funds using a taxable account, this tax break can make a big difference in the taxes you pay. In 2006, Fundranker had some sizable long-term capital gains as well as qualified dividends that benefited from the lower rates. In 2007, although Fundranker did not hold any funds long enough to generate long-term capital gains, some of the dividends paid by Top Eight Model Portfolio funds may be qualified. In 2008, it is possible that Energy Service and Natural Resources, both now in the Top Eight Model Portfolio for their tenth month, will generate long-term capital gains that could be taxed at 0%, depending on your tax bracket.

The tax rules that govern whether dividends are qualified are complex and involve holding periods of underlying securities by the mutual fund itself as well as holding periods of mutual fund shares by individual investors. Fidelity shows YTD qualified dividends for your account at www.fidelity.com as the necessary holding periods end. Qualified dividends also will be shown on your 1099-DIV. If a necessary holding period ends after your original 1099-DIV is generated, Fidelity will send you a corrected 1099-DIV.

Holding Period Alert

If you purchased shares after December 3 of any funds which are being exchanged on January 3, then to avoid a *roundtrip* transaction under Fidelity's frequent trading policy for Select funds, you should wait at least 31 days before exchanging the funds. If that date is after January 11, to get back in sync with Fundranker exchange dates, consider holding the funds through January and making appropriate exchanges on February 4, to funds in the Top Eight Model Portfolio for February.

Investing New Money

If you are a new subscriber or you have new money to invest using the Fundranker system, first put the new money into Select Money Market. To reduce exposure to *roundtrip* transactions, on the next *Invest New Money Date* (see box below), exchange your new money into the funds in the Top Eight Model Portfolio for that month.

New subscribers should allocate equal amounts to each of the eight funds. If you already have a portfolio of Top Eight funds, allocate new money only to funds that are not being exchanged. Allocate it to balance those funds as much as possible. When you make exchanges the following month, be careful to avoid *roundtrip* transactions, described at left in *Holding Period Alert*.
